

An aerial photograph of a stream flowing through a dense forest. The stream is heavily obstructed by a large jam of fallen logs and branches, creating a series of small pools and rapids. The surrounding forest is lush with green trees, and the background shows misty, forested hills. The text "Drinking Water Providers Partnership" and "McKenzie River Sub-basin" is overlaid in white. A blue plus sign is visible in the center of the stream, and a red line is in the bottom right corner.

Drinking Water Providers Partnership McKenzie River Sub-basin

Deer Creek 2020

South Fork McKenzie Jan 2020

DWPP Investment

- + 7 grants since 2016
- + ~\$328k
- + Floodplain/valley bottom project focus
- + Range of activities funded
- + Different applicants (Council, Trust, USFS)

Align with Existing Priority Projects

- + Existing goals and objectives
- + Established partnerships
- + Demonstrated project history
- + Established monitoring & outreach plans

Diverse Range of Project Activities

- + Contracted services
- + Revegetation
- + Project management (all partners)
- + Planning (USFS)
- + Outreach
- + Monitoring

Habitat and Water Quality Benefits

- + Enhance hyporheic exchange (retention of sediment)
- + Enhance resiliency to high flows (storage of fines and water)
- + Enhanced connectivity and diversity of water velocities
- + Riparian vegetation

Funding Agreements

- + Most applications through USFS
- + Master Agreement/SPA
- + MWC and MRT have also directly applied

Alignment with EWEB

- + Strong established relationships
- + EWEB cited threats to WQ
- + Project-specific coordination
- + LOS and match funding
